Remark:(1)The minimum order of filter tube is 1T, and the filter ball is 50,000pcs.

(2)All the unit prices below do not include the packing charge.

(3)Payment: 40% deposit by Telegraphic Transfer upon confirmation of P/I, balance payment settled by T.T. before shipment.

all prices is excl shipping and import duty

### Ceramic Filter Tubes

A filter medium consisting of porous ceramic pipes suitable for use in freshwater and saltwater aquariums.

Double features filter medium,can be used as a mechanical prefilter medium for coarse particles or as a biological filter medium.As prefilter medium,protects the biological filter material from rapid silting

The hollow structure provides ideal conditions for benficial bacteria,whilst at the same time allowing excellent rates of water-turnover.

Highly efficient surface for beneficial bacteria to colonize.

### Filter Ball

For use with any external or trickle-type filter.

Made from plastic that does not react with water.

Special structure of the balls to guarantee maximum flow rates at high-efficiency decomposition of ammonium and nitrite through optimum oxygen supply.
