Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

RECTANGULAR AQUARIUMS

Rectangular aquariums have long been the most popular style available. These models are commonly placed against a wall, in a corner, or in the middle of a room for 360° viewing. Rectangle aquariums are also frequently used for room dividers and in-wall installations. Rectangle models that are 72" long or less feature bent (seamless) front corners. Standard rectangle acrylic aquariums are made from 1/2", 3/8" or 1/4" acrylic.

ULTRAQUARIUMS

Ultraaquariums are Tenecor's popular larger aquariums in the 300 to 1300 gallon range, utilizing 3/4" or thicker acrylic. Ultraaquarium Show and Marine Ready prices include a colored back. Ultraaquarium Simplicity Plus aquariums are available as a standard model in 96" and 72" lengths up to 36" high and in other sizes on a custom basis. Acrylic furniture is not available for Ultraaquariums, except on a custom basis. All Ultraaquariums have square corners standard. Steel stands with or without decorative facades are available on a custom quote basis.

FLAT BACK HEXAGON AQUARIUMS

Tenecor Flat Back Hexagon aquariums are a unique alternative to the traditional rectangular shape. The one piece front is beveled at both front corners providing a stimulating visual display. All Flat Back Hexagon acrylic aquariums feature bent front corners.

HALF CYLINDER AQUARIUMS

The half cylinder is one of Tenecor's newer standard designs. Our advanced oven forming techniques allow us to manufacture an acrylic aquarium with an amazing "all around" panoramic front viewing panel when this aquarium is placed against a wall. All half cylinder stands feature a formed front door that matches the shape of the stand.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

PENTAGON AQUARIUMS

The Pentagon corner aquarium is one of the most popular shapes offered by Tenecor. Certain to enhance any corner, this unique shape is ideal for efficiently utilizing available corner space without compromising aquarium size. All standard Pentagon aquariums feature bent (seamless) front corners.

QUARTER CYLINDER AQUARIUMS

The elegant and clean lines of the Quarter Cylinder make it one of Tenecor's most popular corner aquariums. These models utilize Tenecor's oven-forming techniques to achieve a smooth radius front and provide a stunning seamless viewing area.

HEXAGON AQUARIUMS

The Hexagon aquarium is a classic shape suitable for several applications. Clear hexagon aquariums are ideal for walk-around centerpieces. Hexagons with colored backs feature three colored panels and are also ideal for corners and limited spaces.

VISTA and L - SHAPE AQUARIUMS

The Vista aquarium is a completely unique way to accent any corner. The front panel is formed from a single piece of acrylic for seven seamless viewing areas. Likewise, the L-Shape aquarium makes efficient use of corner space while maximizing the viewing area of your aquatic display.

***Tenecor* Acrylic Aquariums**

Price List Effective January 8, 2007

CYLINDER, BULL NOSE and WAVE AQUARIUMS

These unique aquariums are the perfect accent for the center of a room, as a peninsula aquarium or against a wall where space is at a premium. They are sold as complete packages with aquarium, filtration, furniture and lighting.

LIVING PICTURE and TABLETOP AQUARIUMS

Accent a room or office where space is at a premium with an aquarium on a wall—the “Living Picture” or on a table. These aquariums are ready-to-run saltwater or freshwater displays complete with filtration and lighting.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

PRODUCT DESCRIPTIONS

NEW PRODUCTS AND IMPROVEMENTS: Tenecor is pleased to issue this new price list. You will find the following enhancements in our products and options to meet *your needs* for the finest in acrylic aquariums and aquatic products.

- **Expanded** offering of our popular **Aquarium Packages**.
- **Wilsonart® laminate** aquarium furniture.
- **New** aquariums: *Bull Nose Aquarium* and *Wave Aquarium*.
- **Streamlined** customization options.
- **New** models in our popular Flat Back Hexagon, Ultraaquarium and Pentagon aquariums.

We appreciate your business and hope you find that our newest price list offers you more of what you are looking for. Please feel free to call us with suggestions and, as always, please call us for all your custom aquarium needs. We look forward to serving you!

AQUARIUM PACKAGES: Tenecor is now offering its smaller aquariums and some of our most popular larger sizes of Simplicity Plus and Marine Ready aquarium systems, complete with furniture and lighting as a complete package at significant savings to you. Now you can get Tenecor quality and craftsmanship without having to worry about whether the filtration and lighting will be adequate. On the other hand, if you are an aquatic enthusiast and want to “build your own” aquarium you can do so with Tenecor’s traditional “ala carte” offering, semi-custom options and complete customization capability.

SHOW AQUARIUMS: Show Aquariums are Tenecor's improved version of the traditional, basic aquarium. Simple, versatile, and economical, Tenecor Show aquariums feature a clear acrylic top with filter slots, and extra large access holes with matching lids. Rectangular and other models, 72x24x30 or smaller, feature our signature large radius bends and are available with a clear, black, or deep blue background at the standard price. Show aquariums are ideal for those who already have filtration equipment, or wish to purchase their own. Show aquariums may be upgraded with pre-filters for safe and easy connection to external filtration equipment. Model numbers of the Show Aquarium indicate the shape of the aquarium and the approximate gallons. For Ultraaquariums, the thickness of the acrylic panels is taken into account in determining the approximate gallons of the aquarium.

SHOW AQUARIUMS with PRE-FILTERS: Tenecor has been a leader in innovative designs and application of in-tank pre-filters for reef aquariums. Now our price list includes aquariums with plumbed pre-filters in standard sizes and locations in the aquarium. The pre-filter configuration included in with a show aquarium is also the pre-filter configuration employed by the Marine Ready aquariums.

SIMPLICITY PLUS AQUARIUMS: Simplicity Plus aquariums are a Tenecor original design in which the filter is built into the tank. This advanced wet/dry filter combines mechanical, chemical, and biological filtration for maximum efficiency with fresh or saltwater systems. All Simplicity Plus systems are designed to accommodate the maximum amount of bio-media for dependable, quiet operation. These aquariums have added a new dimension to the hobby and set a new standard in value. Simplicity Plus aquariums come complete with pre-filter sponge, bio-media, powerhead(s), and centipede return kit(s) installed at the factory. These systems may be upgraded with an airlift protein skimmer to optimize performance with saltwater systems. Simplicity Plus aquariums are recommended for freshwater and saltwater “fish only” aquariums.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

PRODUCT DESCRIPTIONS

MARINE READY AQUARIUMS: The majority of our aquariums are available as complete Marine Ready systems. This advanced system combines mechanical, chemical, and biological filtration for maximum efficiency with fresh or saltwater systems. Marine Ready aquariums include plumbed pre-filters, external wet/dry filters with bio-media, magnetic drive pumps, and deluxe plumbing packages. Marine Ready aquariums may be **upgraded** with one of our **Protein Skimmer packages** to optimize performance with saltwater aquariums. Our Silencer may be added to the prefilter that helps minimize filtration noise. The flexible design of this filtration also allows for easy installation of supplemental equipment such as U.V. sterilizers, chillers, etc. Marine Ready aquariums are recommended for more demanding saltwater and reef systems. They are also commonly used for freshwater systems where external filtration is desired.

ACRYLIC STANDS AND CANOPIES. Tenecor acrylic stands and canopies are truly unique. Our stands feature lift-out doors for full access. Our stands are made using the same methods as our aquariums, providing an extra measure of safety by containing most filter drips and leaks. Tenecor's acrylic canopies are shipped with optional acrylic hinges which allow you to easily secure the canopy to your aquarium. Bent corners are standard on 60x24 or smaller acrylic stands and canopies.

UNITEX STANDS AND CANOPIES. Another Tenecor original, Unitex and Tenetex stands create the rich look of stone in several of the most popular decorating color combinations. Our design staff has culled thousands of color samples to present you with the most exciting variety of choices possible. The water resistant finish is extremely durable and easily touched up, ensuring years of satisfaction.

FAUXSTONE STANDS AND CANOPIES. Tenecor's most unique finish recreates the look and style of the Southwest with a Spanish stucco texture. Fauxstone is available in standard beige or can be ordered in hundreds of custom colors. The simple elegance of Fauxstone truly compliments any furnishing style.

TENECOR CLASSIC OAK, VINTAGE MAPLE AND KNOTTY ALDER STANDS AND CANOPIES. Tenecor's Knotty Alder, Oak and Maple stands are hand crafted to have the look and feel of fine furniture. Classic styling, handsome trim, and raised panel doors make Tenecor's Wood stands and canopies a true favorite. Available with your choice of eighteen Minwax® stain colors and sealed with clear coat for durability.

LAMINATE STANDS AND CANOPIES. Tenecor now offers Laminate Stands & Canopies in standard Wilsonart® colors at the same price as our Classic Wood furniture for all products except the Vista Stands and Canopies. Now your color and design options are virtually unlimited. Non-standard colors or special order laminates are also available as a custom order.

AQUARIUM LIGHTING. Tenecor has provided lighting for many years as an accessory. Now the price list provides the price of SunPaq® power compact retrofit lights for saltwater aquariums and Aqualight® freshwater power compact lights that will fit within Tenecor's aquarium canopies.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

PRODUCT DESCRIPTIONS

CUSTOM SIZES AND SHAPES. Many customers request customization of our standard products. For Rectangular, Flat Back Hexagon, Teneview, Bowfront, Pentagon and Quarter Cylinder shapes **reduction** of the length, width or height of a standard model is **generally** available for a \$100 up charge. Simply find the next largest size and add \$100 to the cost of the aquarium, stand or canopy. For example, for a 94x22x28 show aquarium add \$100 to the cost of the R300T (96x24x30) show aquarium. The above does not apply to Ultraaquariums and modifying the shape, increasing the dimensions, expanding the size of the access openings or other modifications, which are not covered by our "Semi-Custom Options for Standard Aquariums and Furniture" (see page 16), require a custom price quote. Please contact your Tenecor Sales Engineer.

SIMPLICITY PLUS & MARINE READY AQUARIUM PACKAGES

Tenecor offers our smaller aquariums, as well as some of our most popular larger models as complete aquarium packages. The packages are priced to provide you significant savings—up to 20% off the price of the items purchased ala-carte.

These packages feature aquariums with our signature **Simplicity Plus** filtration system as well as our flexible and efficient **Marine Ready** filtration systems. In most cases, you have your choice of Black Acrylic, Unitex/Tenetex, Oak, Maple, Knotty Alder or Fauxstone stand/canopy sets. The Simplicity Plus Aquarium Packages come with Aqualight freshwater power compact lights, while most Marine Ready Aquarium Packages include SunPaq power compact lights. Certain Marine Ready Aquarium packages utilize Satellite power compact lights. All Aquarium Packages feature a feeding hole with re-moveable in-tank lip for use with automatic feeders. These Aquarium Packages are sold as complete packages and modifications or deletions/substitutions are not available. Neither Simplicity Plus or Marine Ready packages include protein skimmers, however, they may be added to the package at the standard priced..

Marine Ready Filtration System

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

WHY ACRYLIC?

Acrylic is half the weight of glass.

It's easier to ship, move, and set up your aquarium.

Acrylic is several times stronger than glass.

It will not shatter, crack, or leak like glass can.

Acrylic distorts much less and is clearer than glass.

In addition to having a slight green tint, glass has an index of refraction that is considerably different from water. Incidentally, clear acrylic has almost the same refractive index as seawater so there is no bending of light as it passes from the plastic into seawater, providing better and brighter color and sharper shapes in acrylic aquariums. The huge viewing windows in large public aquariums and oceanariums can be more than 12 inches thick, but because they are made of acrylic, they afford a very clear view of the water and ocean life they enclose. Acrylic also allows better penetration of your system lighting, which is especially important for reef systems.

Acrylic insulates better than glass.

Acrylic controls water temperature fluctuations, one of the primary reasons for fish stress, disease, and death. Glass conducts heat and cold causing more fluctuations.

Acrylic seams are stronger than glass.

Acrylic seams are molecular bonds and actually stronger than the acrylic itself. Silicone seams used on glass aquariums can dry out and weaken over time.

Acrylic seams are visually superior to glass.

Acrylic seams are polished and nearly invisible. Silicone seams are clearly visible and have been known to discolor when exposed to certain fish medications.

Acrylic is easily refinished.

If glass scratches it can not be repaired. Acrylic can be repaired with a variety of scratch removal kits. Even internal scratches can be repaired without removing the fish or water.

Custom formed designs are possible with acrylic.

Acrylic can be formed to create interesting aquarium designs which you won't find with glass aquariums.

WHY TENECOR?

Tenecor's Lifetime Guarantee.

By using only the finest domestic acrylic available we are able to offer a limited lifetime guarantee. You will never worry about a disastrous aquarium leak again.

Tenecor's Selection.

We provide the widest selection of sizes, shapes, and styles. If you don't find what you want in our standard line, we'll design a custom aquarium just for you.

Tenecor's Workmanship.

Our engineers and craftsmen are known for their attention to every detail. All Tenecor aquariums are manufactured in the U.S.A. with the finest materials available.

Tenecor's Standard Features.

Most of our standard aquariums are available with bent corners and colored backs at no extra charge. Our Simplicity Plus and Marine Ready filtration packages include pumps and bio-media for one low price. Other companies charge a premium for these added features.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

WAVE AQUARIUM

The "Wave Aquarium" is Tenecor's newest creation utilizing our state of the art oven forming techniques. The sleek and elegant lines of the front of this aquarium, with matching curved front furniture will become the focal point of attention in you home or office.

The Wave Aquarium is sold as a package only with our popular Simplicity plus and Marine Ready filtration systems. The aquarium has a feeding hole with re-moveable in-tank lip for use with automatic feeders. Stand & Canopy sets are available in your choice of Oak, Maple, Black Acrylic or Unitex/Tenetex Paint finishes. A stand door is on each end of the stand.

The Marine Ready systems include SunPaq power compact lights, while the Simplicity Plus models include the Aqualight.

BULL NOSE AQUARIUM

The "Bull Nose Aquarium" was created to meet the growing demand for "peninsula" type applications. One end of this tank has a flat back like a rectangle and the opposite end has a full radius like a half cylinder.

These models are fabricated with a seamless panel for the walls of the aquarium. The Bull Nose Aquarium is sold as a package only with our Marine Ready filtration system, which includes pre-filter, external wet/dry filter, pump, and plumbing fittings. The aquarium has a blue or black end panel as well as a feeding hole with re-moveable in-tank lip for use with automatic feeders. You also have your choice of stand & canopy sets available in Oak, Maple, Black Acrylic or Unitex/Tenetex Paint finishes. The canopy is hinged for access to the aquarium. The stand features a door on each side. The canopy is slotted on top to vent moisture and heat. All systems include Satellite power compact lights.

CYLINDER AQUARIUM

Cylinder aquariums are the ultimate design for 360 degree viewing. Tenecor uses only seamless cast cylinders made in the U.S. for a completely unobstructed view. This aquarium is available only as a complete system which includes aquarium, stand/canopy, filtration and lights. The filtration system features a black cylinder pre-filter in the center of the tank, external wet/dry filter, pump, and plumbing fittings. The pre-filter overflow comes complete with a dry raceway to conceal lighting cords. The stand & canopy set is available in either Oak, Maple, Unitex, or Tenetex finishes (acrylic cylinder stand/canopy set is not available). The stand features a flush mounted touch-latch door and the canopy is slotted on top to vent moisture and heat. The canopy must be lifted off to access the aquarium. This system also includes a feeding hole with re-moveable in-tank lip for use with automatic feeders and electrical cord grommet, requires customer to a drill hole in the stand. Dimensions: Aquarium: 27.5" x 28.5"H, Stand: 27.625" x 28.25"H, Canopy: 28.5" x 7"H.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

INTERNAL PRE-FILTER OVERFLOWS

Tenecor's in-tank pre-filters are available as "bare" boxes without holes drilled in the aquarium or pre-filter, "drilled" boxes with holes in the pre-filter to customer specification or as "plumbed, ready-to-run" boxes with Tenecor supplied RTR (plumbing) kits. Standard skimming slots on internal pre-filters are ¼" wide x 1 ½" long. Pre-filters are offered in blue or black. Tenecor also can install external pre-filters on aquariums as a custom order.

- **Bare pre-filters** require the customer to drill holes in the aquarium and pre-filter as well as provide plumbing fittings (see **Tenecor** aquarium warranty on page 24).
- **Drilled pre-filters** require the customer to give Tenecor the specifications of the bulkheads/fittings that will be used in the pre-filter.
- **RTR (plumbed) pre-filters** include drain and return fittings, and vinyl tubing for return lines inside the prefilter. Return holes are drilled in the pre-filter wall approximately 3" below the top of top of the pre-filter. Return holes are threaded ½", ¾" diameter to accommodate adjustable ¾" or ½" "centipedes" (return nozzles). Drains can be 1" Sch. 40 bulkheads, or 1.5" Sch. 80 bulkheads. All return bulkheads are Sch. 40. Plumbed pre-filters also include adjustable Centipedes.
- **Modifications** to the standard pre-filter slot or plumbing configurations are available. Customer must specify the desired configuration.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

Tenecor is pleased to offer Coralife Aqualight and Current-USA SunPac power compact lights for most of our Aquarium Packages and Build Your Own Aquariums. These lights may also be purchased as an accessory item.

The SunPac lights are a "retrofit" fixture that attaches to the underside of the aquarium canopy. They are used primarily for saltwater fish aquariums. They may be used in some cases in a coral reef tank, but it is recommended that you contact Tenecor to discuss your specific application.

The Aqualight fixtures are a "hood" type light that sits on top of the aquarium. They are designed for freshwater fish and planted aquariums.

IMPORTANT INFORMATION FOR *Tenecor* AQUARIUM OWNERS

- Do not use any product that contains ammonia, alcohol, or abrasives such as Windex, Comet, Ajax or other commercial cleaners when cleaning the acrylic surfaces of your Tenecor aquarium. Also protect your aquarium from chemical fumes, including paint, varnish, etc. Use or exposure to such cleaners or fumes will cause the acrylic to gradually lose its clarity.
- Do not use coarse sponges or pads to clean the aquarium. A soft cloth and water or polish made specifically for acrylic should be used for cleaning.
- Use of a perimeter support stand, even temporarily, will void the warranty. The aquarium bottom must be fully supported on a flat level surface at all times.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

TERMS & DEFINITIONS

The following guide defines general aquarium terms as well as specific Tenecor product descriptions.

Aquarium - A water filled container in which to keep and raise aquatic animals and plants.

Bent Corners - Corners which are heat bent to achieve a smooth, seamless appearance.

Bio-Media - (also bio-balls) Porous plastic balls with high surface area, conducive to growing beneficial bacteria for biological filtration.

Centipede - A return fitting with flexible segments used to direct water flow in the tank.

Drain - A plumbing connection used to remove water from the tank, usually located in the pre-filter.

Fauxstone - A Tenecor original finish for stands and canopies. This versatile finish recreates the look and style of the southwest with a Spanish stucco texture.

Pre-Filter - (also overflow, skimmer box, weir) - A column or box used to control water flow and route plumbing to and from the aquarium tank. Usually used in conjunction with external wet/dry filtration.

Protein Skimmer - A device used to remove excess waste products from saltwater aquariums. These devices produce a churning effect to separate the waste products which are then held in a collection cup until it can be emptied.

Marine Ready Aquarium - An aquarium with external wet/dry filtration which utilizes mechanical, chemical, and biological filtration which is ideal for more demanding saltwater and reef systems. Marine Ready aquariums come complete with plumbed pre-filter, external wet/dry filter, bio-media, pumps, and plumbing connections. Available with a clear, black, or blue background. Marine Ready aquariums may be upgraded with our Protein Skimmer packages.

Return - Plumbing fittings used to return water to the tank, usually located in the pre-filter.

Rounded Corners - Traditional square corners which are routered and then polished to achieve a smooth rounded look on larger aquariums.

Show Aquarium - An improved version of the traditional basic aquarium. Show Aquariums include extra large access openings, heavy duty lids, and filter slots. Models of 72" in length or less feature seamless bent front corners. Available with a clear, black, or blue background.

Simplicity Plus Aquarium - An aquarium with internal wet/dry filtration which utilizes mechanical, chemical, and biological filtration. The system is built into the tank and hidden from view by a blue or black false back. Simplicity Plus filters come complete with bio-media, powerhead(s), pre-filter sponge, and centipede returns installed at the factory. Simplicity Plus aquariums are suitable for fresh or saltwater fish.

Tenetex - (also Unitex) A Tenecor original finish for stands and canopies. These water resistant finishes create the rich look of stone in thirteen popular color combinations.

Wet/Dry Filter - An external filter which utilizes mechanical, chemical, and biological filtration. Usually used in conjunction with a pre-filter to route water flow to and from the wet/dry filter. Available from Tenecor in seven standard sizes or custom designs.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

FREIGHT POLICIES AND PROCEDURES

Tenecor's standard aquarium delivery service is "curbside delivery". This means your order will be delivered to the curb of the address you specify as the "ship to" address on your order. You will need to be prepared to remove the items on your order from the back of the truck. The delivery charge does not include inside delivery or setup of the aquarium. Deliveries are normally made between 8:00 AM and 5:00 PM Monday through Friday. Accessory item shipments are made by UPS. We rarely have shipping damage to our orders, but to insure that your aquarium is everything you expect we ask you to follow a few procedures.

RECEIVING PROCEDURES

1. Inspect the shipment before you sign for the delivery. The driver may insist you sign for the delivery first, but you have the right to inspect the shipment for damage and must do so.

2. Carefully check the entire shipment for any signs of obvious damage, such as tears in the packaging, broken straps or damage to the skid **or obvious missing items**. If you find any such damage open the packaging, in the driver's presence, as much as possible and attempt to determine if there is additional "hidden" damage to the aquarium or furniture. Have the driver note on both copies of the freight bill the nature and extent of the damage to packaging or contents. Sign for the shipment and make sure the driver signs your copy. Immediately notify Tenecor by phone of the nature of the damage. Your sales representative will assist you in determining whether to accept the shipment or refuse it.

3. After you have received your shipment and removed it from the curb, open all packaging and boxes and verify that your order is complete and there is no damage to the aquarium, furniture or other items. Accessory items are often in boxes inside the aquarium stand or canopy (if you purchased one) so please open all items and look for boxes. If you discover damaged or missing items you **must notify Tenecor within 48 hours of receipt**. Call your Tenecor sales representative to report such damage. You may be requested to send pictures of the damage so we can determine the best course of action. If Tenecor is notified of damage within 48 hours of receipt Tenecor will handle returns, replacement and freight claims. Keep all packaging materials from the shipment for inspection and freight claim purposes. Tenecor will advise you of procedures for returning or discarding damaged items and shipping materials. **If we are not notified within 48 hours of receipt, you will be responsible for return, replacement and freight claims for the damaged or missing items.**

COMMON MISTAKES TO AVOID

- Do not assume the piece count is correct just because the pallet is shrink wrapped. Pieces can slip out of the wrap.
- Don't have someone else accept the shipment unless they are familiar with these procedures. If a neighbor, relative or employee signs for the shipment as being in good shape, you lose the same rights as if you had signed it yourself.
- Don't assume that loose pieces are fine. In fact, you can assume that they are damaged. **Tenecor** puts all common carrier shipments on a pallet for one reason - to protect your merchandise.

If you have any questions regarding these procedures, please call **Tenecor** for more information.

Tenecor Acrylic Aquariums

Price List Effective January 8, 2007

TERMS AND CONDITIONS OF SALE

PAYMENT - All retail sales must be 100% prepaid. Checks, money orders, and major credit cards are accepted. Non-certified checks may be held for 10 days before starting order. There is a \$25.00 charge for all returned checks. Shipments delayed by customer request will be assessed a \$20.00 per day storage fee.

MINIMUM ORDER - \$100.00.

RETURN/CANCELLATION POLICY - Tenecor products are made to order and cannot be returned or cancelled once the order is started. All returns require a "Return Authorization Number" (RAN) and prepaid freight. Returns must be in their original unopened packaging. Unauthorized returns will not be accepted. All authorized returns or order cancellations will incur a 20% restocking or cancellation charge.

ORDER CHANGES – Once an order is entered it is generally not possible to change the order without significant change order charges. The minimum change order charge is \$150. Additional charges for redesign, material reorder, rebuild etc. may apply as well as a delay in estimated ship date.

The terms and conditions above are subject to change - in whole or in part - at any time without prior notice.

TENECOR AQUARIUM WARRANTY

Tenecor Aquariums, a division of CMN Plastics, Inc. warrants all manufactured tanks against external leakage due to faulty craftsmanship for the lifetime * of the aquarium when a solid top aquarium stand is used to support the tank.

USE OF A PERIMETER SUPPORT STAND VOIDS THE WARRANTY. THE AQUARIUM BOTTOM MUST BE FULLY SUPPORTED ON A FLAT, LEVEL SURFACE.

This warranty is subject to the following conditions:

Failure must be the result of a defect in manufacture and not due to improper use, defective material, accident, misuse, abuse or act of Nature. Modification or alteration of the aquarium by drilling, cutting, sawing, gluing anything to, bending, melting, tapping or other similar means voids the warranty. Our liability to the purchaser is limited to the replacement value of the tank and does not extend to the contents or any other consequential damage. *Defective standard aquariums will be repaired or replaced by Tenecor, at our option, during the first two years from the date of purchase at no additional cost to the purchaser. Repair or replacement value from year two to year four will be limited to 40% of the prevailing Tenecor dealer price. Repair or replacement value from year four and on will be limited to 20% of the prevailing Tenecor dealer price.

To be effective, the warranty sheet that comes with your aquarium must be filled out completely and mailed to the factory within Ten (10) days from date of purchase along with proof of purchase, such as a copy of the sales invoice or receipt.

Upon discovery of failure, Tenecor will repair or replace the aquarium, at our option, provided it is returned freight prepaid to Tenecor Aquariums, 4300 E. Magnolia, Phoenix, AZ 85034.

This warranty gives you specific legal rights. You may also have implied warranty rights.
